

Women in Technology

This program helps newcomer women to start a career in IT by building essential technology skills in areas such as programming, web development, and coding. In addition to industry-specific technical training, the Women in Technology program will also provide you with an understanding of Canadian workplace culture, connections to employers, job search coaching, and mentorship.

“The Women in Technology program played a pivotal role in preparing me for employment in Canada. The personal attention was impressive and the program helped us target our resumes, improve our technical skills and get acquainted with Canadian culture. Guest speaker sessions enabled us to connect with people in the industry and we derived motivation from their success. With the help of the ACCES, I found employment in my field.”

— **PARITA GUPTE**, PROJECT ANALYST, TD BANK GROUP, WOMEN IN TECHNOLOGY ALUM
